# SAP Education Standard

- [Certified Professional SAP Enterprise Architect](#)

- Certified Associate SAP Enterprise Architect

Enterprise architects enable flexible adoption of enterprise SOA, and possess a broad organizational perspective that involves both technical and strategic activities. In addition, enterprise architects are charged with mapping your current enterprise IT landscape, planning target architecture, and managing the transition from the current architecture to target architecture tied to business goals and objectives.

- Organizational Change Management (OCM)

Learn how to manage change projects in organizations and how to manage your stakeholders in a project. Courses cover Training Needs Analysis (TNA), training conceptions, set up of communication channels and communication strategy.

- Enterprise Service Development

The enterprise service developer models, designs, and implements enterprise services using ABAP and Java programming.

- Enterprise Architecture

# SAP Education Standard
