2017

SAP – EWM

Timeline:

- Design & Blueprinting - November 2013
- GO-Live - May 2014

Key Success Factors:

- Detailed Blueprinting
- Limited Customisation
- Phased Implementation
- Intensive End-user training

Lessons Learnt:

- Change Management
- Simple solutions
- Housekeeping
- Reporting
- ERP EHP6.0 upgrade
- [Pick HU is Full] – This will result in the picker being directed to the Pack Work centre. A new warehouse order will automatically be created for the tasks that were not picked.
- [End WHO] – This code will complete the warehouse order and place the remaining tasks back in the pool of available tasks (eg lunch, comfort break etc)

SAP EWM

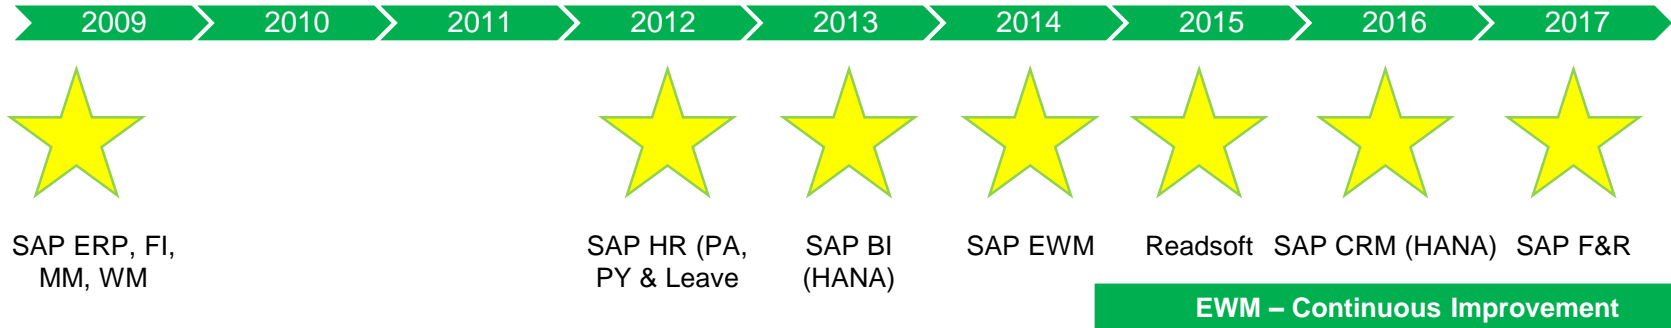

EWM – Continuous Improvement

SAP – EWM – Continuous Improvement

- System Guided Packaging
- Warehouse Order Prioritisation
- Invoice Before Goods Issue
- Voice Picking
- EHP 9.4
- Fiori

SAP Journey | Highlights

SAP – Forecasting & Replenishment

Timeline:

- Design & Blueprinting - December 2016
- GO-Live (Soft) - April 2017

- Advanced Shipping Notifications
- SAP HR – Org Management
- EWM – MFS Integration
- SAP Transportation Management
- EWM on HANA
- IoT – EWM
- ERP EHP 7

THANK YOU

The background of the slide features a dark blue gradient with a large, bright yellow curved shape in the top right corner. Silhouettes of several business professionals in a meeting are visible across the lower half of the slide. One person in the center is holding a glowing lightbulb icon.

It's time to **Reimagine** infinite possibilities
